DETAILED ACTION

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-72 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims are directed to a method, system or process for performing a division via a mathematical algorithm to generate a division result. The claims are not limited to a practical application of the mathematical algorithm because the division result is not a useful, concrete and tangible result. More specifically the division result is not a tangible result because it is not a real-world result.

Claims 1-12, 37-42 and 55-60 are directed to a program per se. While the program contains functionally descriptive material the recording of the functionally descriptive material on some compute-readable medium that would enable the functionality to be realized, fails to be recited.

Claim Rejections - 35 USC § 112

2. Claims 1-36 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2193

The “wherein” phrase of lines 4-5 is mis-descriptive because the “compound exponent value” is not included on the “scaled approximate reciprocal of the divisor value” notwithstanding the fact that the compound exponent value may be used in calculating or computing the scaled approximate reciprocal of the divisor value. Similarly note claims 13 and 25.

Allowable Subject Matter

3. Claims 73-77 are allowed.

Specification

4. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David H. Malzahn whose telephone number is (571) 272-3727. The examiner can normally be reached on MTh from 7:30 to 6:00.
